Evidence-based practice
Making it a reality in your healthcare organization

A transformational journey to improve healthcare quality and patient outcomes

Our 2014 workshops: March 3-7, Columbus; September 8-12, planned for Flagstaff, AZ; October 20-24, Columbus; December 1-5, planned for Atlanta

This unique program is a “deep-dive” immersion into evidence-based practice, as well as effective strategies for integrating and sustaining EBP in clinical organizations of any size or level of complexity. Participants will return from this experience with an action plan for implementing and sustaining evidence-based practice changes and transforming their organizational culture.

If you are looking for a single program to ignite and sustain the evidence-based practice shift in your healthcare organization...this is it!

CTEP is your partner in achieving and sustaining improved healthcare quality and patient outcomes.
